SUMMARY:

Dynamic **Frontend Developer** with 1 year of experience in creating responsive, user-friendly interfaces using **React.js**, **Tailwind CSS**, and **Material-UI**. Proficient in building scalable web applications with basic knowledge of **Nest.js** and **MySQL** for backend integration. Seeking a full-time role to leverage technical expertise and passion for delivering seamless user experiences

TECHNICAL SKILLS:

- **Frontend Development** - HTML5, CSS3, JavaScript, React.js, Material-UI, Bootstrap, Tailwind CSS, Framer Motion
- **Backend & Development tools** - Nest.js, MySQL, REST APIs, Postman, Git (Version Control), VS Code
- **Soft Skills** – Troubleshooting, Problem Solving, Team Management, Decision

EXPERIENCE:

Frontend Developer - Lets Notify | December 2023 - Current

Tools and Technologies - HTML, CSS, JavaScript, React.js, Nest.js, MySQL, Git

- Developed and implemented dynamic user interfaces using **React.js** and **Material UI**, improving user satisfaction used Nest.js for backend, and MySQL for database management.
- Developed a centralized **Axios instance** with interceptors to streamline API management and reduce code redundancy by 20%.
- Built a library of **Reusable UI components**, improving development efficiency and ensuring design consistency across whole project.
- Collaborated with backend team to implement **Nest.js microservices**, achieving optimized API integrations and 99.9% uptime.
- Validated and tested the performance and reliability of APIs by integrating them with the UI, ensuring seamless functionality across endpoints.
- Conducted **Code reviews** and implemented best practices for Git workflows to maintain code quality and team efficiency.

PROJECTS:

Crypto Tracker - Frontend Development ([Try It Here](#))

Tech Stack: React, Framer Motion, Material-UI, Chart.js, Coin Gecko API

- Developed a dynamic and interactive UI using **React** and **Material-UI** components for a sleek design.
- Integrated **Chart.js** for visually engaging cryptocurrency price charts and data visualization from Coin Gecko API.
- Enhanced user engagement with **Framer Motion**, creating smooth animations for interactive experiences.
- Enhances user engagement using Framer Motion to create smooth animations for phone interactions and text entrance effects
- Implemented light and dark mode functionality using **local storage** and **CSS variables**, ensuring personalized user preferences.

Podcast App - Frontend Development ([Try It Here](#))

Tech Stack: React, Firebase, Redux Toolkit,

- Designed an intuitive interface with **CRUD operations** for managing podcast content using **React**.
- Implemented **Firebase Auth, Fire store, and Storage** for user authentication and podcast management
- Leveraged **Redux Toolkit** for efficient state management and streamlined data updates.
- Built a custom **JavaScript music player**, allowing users to track and listen to podcasts seamlessly.

EDUCATION:

Bachelor of Computer Application:

St. Andrews Institute of Technology and Management | August 2017 - August 2020

Secondary Education:

Central Board Secondary Education | May 2015 - May 2017
